SUBJECT INDEX

to Volume 142, January–April 1996

Acclimation, stress resistance in *Drosophila buzzatii*, 471
Actin, gene, in *Arabidopsis thaliana*, 587
Actin related protein 14D, gene, molecular characterization, 879
Adaptive mutation, in *Escherichia coli*, 25
  Holliday junctions in, 681
Alleles
  dpp, signal transduction in *Drosophila melanogaster*, 493
  Drosophila purple gene, structure and expression, 1157
  generic estimation of population subdivision, 1061
  PMS (postmeiotic segregation), mismatch repair and hyperrecombination in *Saccharomyces cerevisiae*, 407
  restoration-of-fertility allele in diploid pollen of maize, 1001
Alternative oxidase activity, *Neurospora crassa*, 129
Amber mutations, suppression of temperature-sensitive mutations in phage Mu repressor, 661
Analysis of molecular variance (AMOVA), generic estimation of population subdivision, 1061
Androgenetic zebrafish, production of, 1265
Aphally, in *Bulinus truncatus*, genetic and environmental determination, 217
Arabidopsis thaliana
  actin gene evolution in, 587
  intermated populations, genome-wide high-resolution mapping, 247
  non-LTR retrotransposons in genome, 569
  retrotransposons in mitochondrial genome, 579
Arginine, translational control in *Neurospora*, 117
Aspergillus nidulans, chromosome structure and segregation, *bimD* and *sud* gene interaction in, 777
Autosome(s), hybrid male sterility in *Drosophila*, 1169

Bacteria. *See also Escherichia coli*
  codon bias, site-specific, 1037
  enteric, evolution of cobalamin synthesis and metabolism, 11
Bacteriophage, temperature-sensitive mutations in Mu repressor, amber mutant suppression of, 661
Bayesian procedures, mutation rate estimation from fluctuation analysis data, 313
Body weight, genetic map of QTL for body weight (mouse), 227
Bottlenecks, genetic polymorphism in *Bulinus truncatus*, 1237
Bovine growth hormone, gene, single-strand conformation polymorphism haplotypes at, association with milk protein percentage, 945
Breeding. *See also* Mating
  Solanum intragenomic recombination, 1335
Bulinus truncatus
  aphally in, genetic and environmental determination, 217
  consequences of selfing and bottlenecks on genetic polymorphism, 1237

Caenorhabditis elegans
  mapping QTLs for life history traits in, 801
  pag-3 gene, touch neuron gene expression and coordinated movement, 141
  worm spadework (*Perspectives*), 1065
Calcineurin A 14D, gene, molecular characterization, 879
Calnexin, gene, molecular characterization, 879
Centromere(s), 1277
Centromere-linkage analysis, zebrafish, 1277
Ceratopteris richardii, sex-determining genes, genetic interactions, 973
Chromatin, structure, Ty insertion sites and, in *Saccharomyces cerevisiae*, 761
Chromosome(s)
  achiasmate chromosome segregation, in *Saccharomyces cerevisiae*, 79
  meiotic condensation and synapsis, in *Coprinus cinereus*, *rad9* gene in, 1105
  physical mapping method to reconstruct a chromosome, statistical consistency, 267
  structure and segregation, in *Aspergillus nidulans*, *bimD* and *sud* gene interaction in, 777
Chromosome 11, *Om (Ovum mutant)* locus, transmission-ratio distortion, in DDK syndrome (mouse), 1299
Chromosome associated protein, gene, molecular characterization, 879
Cloning, mast cell growth factor (*Mgf*) gene (mouse), 927
Cobalamin, synthesis and metabolism in enteric bacteria, evolution of, 11
Codon bias
  selection intensity for, effective population size of *Escherichia coli* and, 1379
  site-specific, in bacteria, 1037
Coenzyme B_{12}, synthesis and metabolism in enteric bacteria, evolution of, 11
Complementation
  Steel mutants (mouse), 935
  at *suppressor of forked* locus of *Drosophila*, 1225
Concerted evolution, recombination among tandem *Su(Ste)* repeats on *Y* chromosome in *Drosophila melanogaster*, 149
Coprinus cinereus, meiotic chromosome condensation and synapsis, *rad9* gene in, 1105
Corrigendum, 327, 651

Crossing over, differences in crossover frequency and distribution among *Drosophila* spp., 507
Cytoplasmic instability, in Columbian *Drosophila pseudoobscura*, 189

DDK syndrome (mouse), transmission-ratio distortion at chromosome *11 Om* locus, 1299
DNA
  double-strand break
    homologous recombination and, in yeast, 91
    initiation of mitotic recombination, in *Schizosaccharomyces pombe*, 341
    single-strand annealing pathway of repair, genetic control, in yeast, 693
  heteroduplex, mismatch repair and hyperrecombination in *Saccharomyces cerevisiae*, 407
  mitochondrial. *See* Mitochondrial DNA
  single-strand, 3′ and 5′ single-strand DNA ends in intermediates during recombination, 333
DNA polymerase, 3′ → 5′ exonucleases of DNA polymerases ϵ and δ correct base analog-induced DNA replication errors in *Saccharomyces cerevisiae*, 717
DNA repair
  double-strand break
    homologous recombination and, in yeast, 91
    single-strand annealing pathway, genetic control, in yeast, 693
  Ds footprints and DNA repair in maize, 237
  in *Saccharomyces cerevisiae*, large subunit of replication factor C in, 65
DNA replication
  base analog-induced errors in *Saccharomyces cerevisiae*, correction by 3′→5′ exonucleases of DNA polymerases ϵ and δ, 717
  in *Saccharomyces cerevisiae*, large subunit of replication factor C in, 65
DNA sequence analysis
  estimating mating systems in plants, 619
  internal deletions in *MuDR:Cy* and derivative transposons in maize, 603
  lungfish mtDNA, 1249
Drosophila spp.
  engrailed and *invected* gene pair, function, 893
  eye development, Raf signaling in, modifiers of, 163
  Fused (Fu) protein functional domains, 1181
  fushi tarazu (FTZ) protein, homeodomain-independent activity of, 459
  hybrid incompatibility in, 819
  hybrid sterility, autosome-mediated, 1169
  kinesin and ion channel mutations in, 195
  meiotic recombination, differences in crossover frequency and distribution, 507
  morphological shape differences in male genitalia, mapping QTLs for, 1129
  purple gene, alleles, structure and expression, 1157
  pushover mutations and synaptic transmission, 1215
  rearrangements within *P* elements, 459
  runt gene, maternal modifiers, 839
  signal transduction, Fused (Fu) protein and, 1181
Drosophila buzzatii, stress resistance, genetics, 471
Drosophila hydei, *gypsy* transcripts in *Y*-chromosome male fertility gene, 437
Drosophila melanogaster
  cytoplasmic dynein function in, 865
  eye development, enhancers of *glass* gene, 1199
  frizzled mutations, molecular genetics, 205
  gene susceptibility to silencing by nearby heterochromatin in, 447
  gypsy-induced mutations, mediation by interactions between *su(Hw)* and *mod(mdg4)* mutations, 425
  Hermes transposition rate in, implications for genetic transformation technology, 907
  larval development, *Sternopleural* mutation and, 1147
  para sodium channel gene cluster, molecular analysis, 879
  recombination among tandem *Su(Ste)* repeats on *Y* chromosome, 149
  signal transduction in, molecular analysis of *dpp* alleles, 493
  Stellate's involvement in meiotic drive (*letter*), 641
  suppressor of forked locus, complementation at, 1225
  white-eyed mutant, genesis (*Perspectives*), 329
Drosophila pseudoobscura, mitochondrial DNA haplotypes, frequency changes in, 189
Drosophila subobscura, inversion polymorphism of *O* chromosome, seasonal variation, 179
Drosophila virilis, *hobo*-mediated germline transformation, 173
Dynein, cytoplasmic, in *Drosophila melanogaster*, 865

Effective population size, *Escherichia coli*, selection intensity for codon bias and, 1379
Embryogenesis
  embryonic transcription and control of developmental pathways, 5
  maternal modifiers of *Drosophila* segmentation gene *runt*, 839
Enterobacteria
  codon bias, site-specific, 1037
  evolution of cobalamin synthesis and metabolism, 11
Epichloë typhina, inheritance of mitochondrial DNA, 259
Escherichia coli
  adaptive mutation
    Holliday junctions in, 681
    recombination in, 25
  effective population size, selection intensity for codon bias and, 1379
  evolution of cobalamin synthesis and metabolism, 11
Evolution
  actin gene, in *Arabidopsis thaliana*, 587
  cobalamin synthesis and metabolism in enteric bacteria, 11
  estimating long-term mating systems in plants using DNA sequences, 619

evolution of fitness in experimental populations of vesicular stomatitis virus, 673
hedgehog gene family, 965
homeobox genes, Antennapedia (*antp*)-class, 295
human mtDNA, 953
sex, limited dispersal and deleterious mutations and, 1053
sturgeon mitochondrial DNA, 525
Eye development, *Drosophila*
enhancers of *glass* gene, 1199
Raf signaling in, modifiers of, 163

Fingerprinting, physical mapping by binary fingerprinting of DNA fragments, 267
Fitness, evolution of fitness in experimental populations of vesicular stomatitis virus, 673
Fluctuation analysis, Bayesian mutation rate estimation, 313
Folate coenzymes, in *Saccharomyces cerevisiae*, 371
Footprints, *Ds* footprints and DNA repair in maize, 237
F-statistics, isozyme and quantitative genetic variation in *Pinus contorta* ssp. *latifolia*, 1045

Gap repair, interrupted, internal deletions in *MuDR:Cy* and derivative transposons in maize and, 603
Gene(s)
actin, in *Arabidopsis thaliana*, 587
activator-independent gene expression in *Neurospora crassa*, 417
agouti, hypervariable yellow (A^{hvy}) mutation and (mice), 557
alternative oxidase (*aod*), *Neurospora crassa*, 129
arg-2, translational control in *Neurospora*, 117
bimD and *sud* interaction in chromosome structure and segregation in *Aspergillus nidulans*, 777
bovine growth hormone, single-strand conformation polymorphism haplotypes at, association with milk protein percentage, 945
bud morphogenesis, in *Saccharomyces cerevisiae*, 39
change in gene frequency of a selected allele in partial full-sib mating populations (*letter*), 649
cobalamin synthesis, in enteric bacteria, 11
disease-resistant, transfer into potato cultivars, 1335
engrailed and *invected* gene pair, function, 893
frizzled, molecular genetics, 205
fused, functional domains of protein product, 1181
fushi tarazu (*FTZ*), homeodomain-independent activity of FTZ protein, 459
gene dosage effects on gene expression in maize ploidy series, 1349
glass, autosomal genes enhancing, 1199
hedgehog family, evolution, 965
homeobox, evolution, 295
HRS1, molecular analysis, 705
mac1, commitment to meiosis in maize, 1009
MAL, glucose repression, 51
male fertility gene *Q*, *Drosophila hydei*, *gypsy* transcripts in, 437
mast cell growth factor (*Mgf*), cloning and sequence of full-length transcription unit (mouse), 927
mismatch repair genes *MSH2* and *MSH3*, role in *RAD1-RAD10* pathway of mitotic recombination, 727
neurally expressing genes in *para* gene cluster, 879
pag-3, *Caenorhabditis elegans*, touch neuron gene expression and coordinated movement, 141
purple, structure and expression of alleles, 1157
rad9, meiotic chromosome condensation and synapsis, 1105
RHO3, bud formation in *Saccharomyces cerevisiae*, 359
rice *R* genes, 1021
ROX3, function in global stress response pathway in yeast, 1083
runt, maternal modifiers, 839
S-adenosylmethionine synthetase, in *Neurospora crassa*, 789
sex-determining, in *Ceratopteris richardii*, 973
Steel, regulation (mice), 927
Stellate, involvement in meiotic drive (*letter*), 641
su(f), 1225
susceptibility to silencing by nearby heterochromatin in *Drosophila melanogaster*, 447
28S rRNA genes, *R2* insertion into, 5′ junction sequences in, 853
wingless, *Sternopleural* regulatory allele, larval development in *Drosophila melanogaster*, 1147
Gene conversion, recombination among tandem *Su(Ste)* repeats on *Y* chromosome in *Drosophila melanogaster*, 149
Genetic differentiation, isozyme and quantitative genetic variation in *Pinus contorta* ssp. *latifolia*, 1045
Genetics Society of America Awards
Genetics Society of America Medal, 3
Thomas Hunt Morgan Medal, 1
Genetics Society of America Medal
essay, 5
Wieschaus, Eric, 3
Genetic transformation technology, gene vectors, *Hermes* transposable element, transposition rate in *Drosophila melanogaster*, 907
Gene vectors, *Hermes* transposable element, transposition rate in *Drosophila melanogaster*, 907
Genome
Arabidopsis thaliana, non-LTR retrotransposons in, 569
mapping, organization of sugarcane cultivars, 987
mitochondrial
Arabidopsis thaliana, retrotransposons in, 579
lungfish, DNA sequence, 1249
Genotype, assigning haplotypes from genotypes of parents and progeny, 1363
Germline transformation, in *Drosophila virilis*, *hobo*-mediated, 173

Glucose, *MAL* gene expression, 51
Growth and development
bud formation in *Saccharomyces cerevisiae*, *rho3* mutants and, 359
QTLs for murine growth, 1305
Saccharomyces cerevisiae, RNA polymerase II underproduction and, 737

Haldane's rule, hybrid incompatibility in *Drosophila*, 819
Haplotypes
assigning haplotypes from genotypes of parents and progeny, 1363
mitochondrial DNA, frequency changes in *Drosophila pseudoobscura*, 189
single-strand conformation polymorphism haplotypes at bovine growth hormone gene and milk protein percentage, 945
Heterochromatin, gene susceptibility to silencing by nearby heterochromatin in *Drosophila melanogaster*, 447
Hierarchical analysis, nucleotide diversity, 629
Histones, Ty insertion sites and chromatin structure in *Saccharomyces cerevisiae*, 761
hobo, germline transformation in *Drosophila virilis*, 173
Hogben, Lancelot (1895–1975) (*Perspectives*), 655
Holliday junctions, in adaptive mutation, 681
Homeobox. *See* Gene(s), homeobox
Hybridization, introgressive, *Solanum* spp., 1335
Hybrids
autosome-mediated male sterility in *Drosophila*, 1169
hybrid incompatibility in *Drosophila*, 819

Inositol auxotrophy, *Saccharomyces cerevisiae*, RNA polymerase II underproduction and, 737
Ion channel(s)
mutations in *Drosophila*, 195
sodium channel, *para* gene cluster, 879

Kinesin, heavy chain (*Khc*) mutations in *Drosophila*, 195
Ku homologue, *Saccharomyces cerevisiae*, radiosensitivity and, 91

Letter to the editor
further evidence consistent with *Stellate*'s involvement in meiotic drive, 641
measuring meiotic drive, 645
note on change in gene frequency of a selected allele in partial full-sib mating populations, 649
Life history, mapping QTLs for life history traits, in *Caenorhabditis elegans*, 801
LINE-1
Mus spretus LINE-1 sequences in C57BL/6J mice, 549
persistent LINE-1 lineages in *Peromyscus*, 1289
Linkage analysis, assigning haplotypes from genotypes of parents and progeny, 1363
Lungfish, mitochondrial genome DNA sequence, 1249

Maize
Ds footprints and DNA repair in, 237
gametophyte genetics, restoration-of-fertility allele in diploid pollen, 1001
gene expression in ploidy series, dosage effects, 1349
MuDR:Cy and derivative transposons, internal deletions in, 603
switch from vegetative to meiotic pathway in, *mac1* gene and, 1009
Mapping
differences in crossover frequency and distribution among *Drosophila* spp., 507
genetic map functions, 1369
genome organization of sugarcane cultivars, 987
genome-wide high-resolution mapping, intermated populations, 247
physical, internal deletions in *MuDR:Cy* and derivative transposons in maize, 603
physical mapping method to reconstruct a chromosome, statistical consistency, 267
QTLs
for body weight (mouse), 227
for life history traits, in *Caenorhabditis elegans*, 801
for morphological shape differences in male genitalia, in *Drosophila* spp., 1129
multiple, Monte Carlo method, 305
recombination rates in mice, 537
zebrafish genetic map, centromere-linkage analysis and consolidation of, 1277
Mast cell growth factor, gene, cloning and sequence of full-length transcription unit (mouse), 927
Mating
hybrid incompatibility in *Drosophila*, 819
mating preference in Columbian *Drosophila pseudoobscura*, 189
partial full-sib mating, change in gene frequency of a selected allele in (*letter*), 649
plants, estimating long-term mating systems using DNA sequences, 619
Meiosis
achiasmate chromosome segregation, in *Saccharomyces cerevisiae*, 79
chromosome condensation and synapsis, in *Coprinus cinereus*, *rad9* gene in, 1105
in maize, *mac1* gene and, 1009
Meiotic drive
measuring (*letter*), 645
Stellate's involvement in (*letter*), 641
Meselson, Matthew, Thomas Hunt Morgan Medal, 1
Mice
DDK sybdrome, transmission-ratio distortion at chromosome *11 Om* locus, 1299
genetic map of QTL for body weight, 227
hypervariable yellow (A^{hvy}) mutation at *agouti* locus, molecular characteristics, 557
multiple pathways for *Steel* regulation, 927
Mus spretus LINE-1 sequences in C57BL/6J mice, 549

QTLs for murine growth, 1305
recombination rates, estimation from density of markers on a genetic map, 537
Steel mutants, deletion and complementation analysis, 935
Microsatellites
generic estimation of population subdivision, 1061
genetic polymorphism in *Bulinus truncatus*, 1237
Milk, protein content, association with single-strand conformation polymorphism haplotypes at bovine growth hormone gene, 945
Mitochondria, *Neurospora crassa*, alternative oxidase activity, 129
Mitochondrial DNA
diversity, in Mongolian populations, implications for origin of New World founders, 1321
haplotypes, frequency changes in *Drosophila pseudoobscura*, 189
human, nonneutral variation, 953
inheritance, in *Epichloë typhina*, 259
length variation, heteroplasmy, and sequence divergence, in sturgeon (*Acipenser*), 525
lungfish, 1249
Models/modeling
limited dispersal and evolution of sex, 1053
physical mapping by binary fingerprinting of DNA fragments, 267
stepwise mutation model, measures of population subdivision, 1357
Mongolian populations, mitochondrial DNA diversity, implications for origin of New World founders, 1321
Monte Carlo expectation-maximization algorithm, mapping multiple QTLs, 305
Movement, *Caenorhabditis elegans, pag-3* gene and, 141
mRNA, mast cell growth factor (*Mgf*), full-length (mouse), 927
Mutant(s)
eth-1^{r}, *Neurospora crassa*, locus encoding S-adenosylmethionine synthase, 789
MAL63 constitutive mutant, Mig1p modulation, 51
Om (Ovum mutant) locus on chromosome *11*, transmission-ratio distortion, in DDK syndrome (mouse), 1299
rho3, bud formation in *Saccharomyces cerevisiae*, 359
Steel (mouse), deletion and complementation analysis, 935
white-eyed mutant in *Drosophila melanogaster*, genesis (*Perspectives*), 329
Mutation(s)
adaptive, in *Escherichia coli*, 25
Holliday junctions in, 681
Bayesian mutation rate estimation from fluctuation analysis data, 313
frizzled mutations in *Drosophila melanogaster*, molecular genetics, 205
gcr3 suppression of *hrp1* mutants in *Saccharomyces cerevisiae*, 1095
gypsy-induced mutations in *Drosophila melanogaster*, mediation by interactions between *su(Hw)* and *mod(mdg4)* mutations, 425
hypervariable yellow (A^{hvy}) mutation at *agouti* locus (mice), molecular characteristics, 557
kinesin and ion channel mutations in *Drosophila*, 195
modifiers of Raf signaling in *Drosophila* eye development, 163
pushover mutations and synaptic transmission in *Drosophila*, 1215
rad, in *Saccharomyces cerevisiae*, illegitimate recombination and, 383
RNA polymerase II transcriptional complex mutations, suppressors of hyperrecombination mutant *hpr1* of *Saccharomyces cerevisiae*, 749
sec, protein transport from endoplasmic reticulum to Golgi complex in *Saccharomyces cerevisiae* and, 393
Sternopleural, larval development in *Drosophila melanogaster*, 1147
temperature-sensitive mutations in phage Mu repressor, amber mutant suppression of, 661
transposon footprints, 237
transposon-tagged mutations in *S. cerevisiae* bud morphology genes, 39
in zebrafish, centromere-linkage analysis, 1277
Mycosphaerella graminicola, genetic structure, contributions of sexual reproduction, 1119

Natural selection, stress resistance in *Drosophila buzzatii*, 471
Nervous system, sodium channels, neurally expressing genes in *para* gene cluster, 879
Neurospora crassa
activator-independent gene expression, 417
